- Power supply: 14V / 2A

RADIO II

The Jacobsen II Radio establishes a new standard in radios that unites unique sound and elegant design in an intuitive user universe. The Jacobsen II Radio provides you with easy access to FM-radio with RDS function, MP3/WMA playback through USB or SD/MMC/MS and a clock with alarm function/alarm clock. Using the Aux input and a radio as an external speaker, you can also connect MP3 players, laptop computers and more.

The Jacobsen II Radio is equipped with 2.1 stereo speakers and subwoofer output for fantastic sound reproduction. It also features a built-in equalizer function whereby sound can be set according to music genre: Rock, jazz and pop.

The Jacobsen II Radio also enables you to install rechargeable batteries so you can take the radio with you everywhere – on holiday, to parties, or to the cottage. The Jacobsen II Radio was created to provide you with outstanding music experiences – no matter where you happen to be.

Jacobsen
TOBIAS JACOBSEN

Tobias Jacobsen was born with design in his genes. He is the grandson of world-famous Danish architect and designer Arne Jacobsen and has more than evidently inherited his grandfather's talent for design. A talent that is characterised by a minimalist design philosophy in which all superfluous elements are stripped away to reveal the pure form of the object itself. For Tobias Jacobsen, the story behind the product is also of vital importance in that the product must be created with consideration for both humans and the environment.

Tobias Jacobsen (born 1965) underwent formal training as a goldsmith and industrial designer at Danmarks Designskole. Today, he works with design in a wide range of areas that includes timepieces, jewellery, furniture, architecture and kitchenware.

With a burning passion for food, Tobias has the same kind of feelings for the design as he has for good soup. It is the love for the soup that makes it good, not the pots and pans. Design is about craftsmanship, techniques and love for the products and their practical use.

JACOBSEN RADIO
THE THOUGHTS BEHIND THE DESIGN

I wanted to make a design that expresses good sound with a shape that you would not get tired of looking at. The design should therefore be "quiet". It was not to "make too much noise" and attract too much attention. As I have before, I found inspiration in architecture. I love to watch the city skyline, the mirror facades, competing to be the tallest one.

This gave me the idea for the stringent, sculptural design, which, in its simplicity, offers the user optimal operation with its sloping surface.

The sound quality was to be wide and deep compared with the size of the shape. This made demands on the sound units. And, to avoid buttons, I demanded the latest technology.

To me, the surface or panel where you operate the radio is a starry sky which you can guide yourself around the sound universe – or memories, which music also represents.

I hope that with this design the radio will be a serving spirit, arousing memories, creating pictures and feelings and strengthening the senses of the listeners for a fuller life.

Tobias Jacobsen,
 Member of Danish Designers (mmd)
